

INSTANT HAIR EXTENTION AND METHOD FOR ATTACHMENT

ABSTRACT

An improved hair extension having snap-lock attaching clips useful for instantly attaching or detaching the hair extension or track to the wearer's natural hair. The hair extension comprises 2 to 3 layers of human or synthetic hair tracks sewn together to create one thicker layer and 3 snap-lock clips, all sewn onto the base of the lead extension along the top inside edge. The wearer can quickly and easily apply the extension to their natural hair with the confidence of a firm and secure grip and enjoy the appearance of fuller, longer, more natural looking hair, while maintaining a completely unnoticeable appearance to the on-looker.
